

USLAT2004-498

Country: United States
Title: Los Angeles Times Poll # 2004-498: California
Pre-Presidential Primary
Survey Organization: Los Angeles Times
Sponsor:
Field Dates: February 18-22, 2004
Sample: Adult residents of California
Sample Size: 1,936
Sample Notes:
Interview method: Telephone
Weight Location: Columns 1-7 (xxxxx.xx)
**No. of records
per respondent:** 1
Usage Notes: Use the SPSS generated column guide after the
methodology page if you are using the ASCII data
(lat498.dat) -- not the columns listed in the
codebook.

Please note that data purchased from The Roper Center for Public Opinion Research may not be redisseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

LOS ANGELES TIMES POLL
METHODOLOGY

This Los Angeles Times poll is the 498th in a series of opinion studies designed to measure public attitudes on a number of issues. This pre-election survey focuses on California's upcoming presidential primary election.

The sampling frame for this survey is all telephone residences in the state of California. One thousand nine hundred and thirty-six men and women 18 years of age or older were contacted by telephone February 18-22, 2004. The sample includes 1,521 registered voters of which 1,005 are considered likely to vote including 560 Democratic primary voters (those registered as declined-to-state or independent voters are also permitted to participate).

Results are adjusted to conform with census figures on characteristics such as sex, race, age and education. Telephone numbers were generated from a computer list that includes all possible telephone exchanges in the state. Random-digit dialing techniques were used to ensure that both listed and unlisted residences had an opportunity to be contacted. Interviews were conducted in both English and Spanish.

Readers are reminded that, since survey research normally questions only a small proportion of the population, one must allow a certain margin for error. The margin of sampling error for the entire sample is plus or minus 2 percentage points and among all registered and likely voters, it is 3 points. For Democratic primary voters, it is 4 points. For certain other subgroups, the error margin is somewhat higher.

Surveys of this kind are sometimes subject to different kinds of inaccuracies for which precise estimates cannot be calculated and which may, in some cases, be even larger than the effects associated with sampling procedures. For example, findings may be influenced by events, which take place while the survey is in the field and, of course, events occurring since the time the interviews were conducted could have changed the opinions reported here.

Undetected flaws in the way the sampling and interviewing procedure were carried out could have a significant effect on the findings. Changing the wording of questions and the sequence in which they are asked can produce different results. Sometimes questions are inadvertently biased or misleading. People who responded to the survey may not necessarily replicate the views of those who refused to be interviewed or who could not be found at home during the time the survey was conducted. Moreover, while every precaution has been taken to make these findings completely accurate, other errors may have resulted from the various practical difficulties associated with taking any survey of public opinion.

Susan Pinkus directs the Los Angeles Times Poll under the general supervision of Dean Baquet, managing editor. Jill Darling Richardson is the associate director, Roger Richardson is the field director, Claudia Vaughn is the data management supervisor and Farnaz Calafi is the publications coordinator.

Q18.

As you may know, Proposition 55, the Kindergarten-University Public Education Facilities Bond Act of 2004 provides for a bond issue of \$12.3 billion to fund necessary education facilities to relieve overcrowding and to repair older schools. The measure states that funds will be targeted to areas of greatest need and must be spent according to strict accountability measures. Funds will also be used to upgrade and build new classrooms in the California community colleges and universities to provide adequate education facilities to accommodate growing student enrollment. It will cost the state about \$24.7 billion to pay off both the principal and interest costs on the bond which comes to about \$823 million a year.

Having heard more, if the primary were being held today, would you vote for or against Proposition 55? (ACCEPT "WOULDN'T VOTE" OR "HAVEN'T HEARD ENOUGH" AS A VOLUNTEERED RESPONSE) (IF HAVEN'T HEARD ENOUGH, NOT SURE OR REFUSED, ASK) Well, as of today do you lean more toward voting for it or lean more toward voting against it?

=====

```

Q20.

As you may know, Proposition 56, the State Budget, Related Taxes, Reserve, Voting Requirement and Penalties Initiative permits the Legislature to pass budget and budget-related tax and appropriation bills with 55 percent of the vote rather than a two-thirds vote currently required. It requires that the legislature and governor permanently lose salary and expenses for each day the budget is late. The measure also requires 25 percent of certain state revenue increases be deposited in a reserve fund, which cannot be used to increase spending.

This measure will have varying fiscal impacts, including changes in spending and potentially significant increases in state tax revenues in some years.

Having heard more, if the primary were being held today, would you vote for or against Proposition 56? (ACCEPT "WOULDN'T VOTE" OR "HAVEN'T HEARD ENOUGH" AS A VOLUNTEERED RESPONSE) (IF HAVEN'T HEARD ENOUGH, NOT SURE OR REFUSED, ASK) Well, as of today do you lean more toward voting for it or lean more toward voting against it?

Q22.

As you may know, Proposition 57, the Economic Recovery Bond Act is a one time bond of up to \$15 billion to pay off the state's accumulated General Fund deficit as of June 30, 2004. The bond will only be issued if the California Balanced Budget Act, which is Proposition 58, is also approved by the voters. The bonds will be secured by existing tax revenues that could be deposited in a special fund.

The fiscal impact would be a one-time increase of up to \$4 billion to reduce the state's budget shortfall and annual debt-service savings over the next few years. These effects would be offset by higher annual debt- service costs in future years due to this bond's longer term and larger size.

Having heard more, if the primary were being held today, would you vote for or against Proposition 57? (ACCEPT "WOULDN'T VOTE" OR "HAVEN'T HEARD ENOUGH" AS A VOLUNTEERED RESPONSE) (IF HAVEN'T HEARD ENOUGH, NOT SURE OR REFUSED, ASK) Well, as of today do you lean more toward voting for it or lean more toward voting against it?

Q26.

As you may know, Proposition 58, the California Balanced Budget Act requires enactment of a balanced budget where General Fund expenditures do not exceed estimated General Fund revenues. It allows the governor to proclaim a fiscal emergency in specified circumstances and submit proposed legislation to address the fiscal emergency. It also establishes a budget reserve, and provides that Proposition 57 - Economic Recovery Bond Act - is for a single object or work. It prohibits any future deficit bonds.

The net state fiscal effects are unknown, but will vary year by year depending in part on actions of future legislatures. Balanced budget and debt limitation provisions could result in more immediate actions to correct budgetary shortfalls.

Having heard more, if the primary were being held today, would you vote for or against Proposition 58? (ACCEPT "WOULDN'T VOTE" OR "HAVEN'T HEARD ENOUGH" AS A VOLUNTEERED RESPONSE) (IF HAVEN'T HEARD ENOUGH, NOT SURE OR REFUSED, ASK) Well, as of today do you lean more toward voting for it or lean more toward voting against it?
