LOS ANGELES TIMES POLL
METHODOLOGY

This Los Angeles Times poll is the 483rd in a series of opinion studies designed to measure public attitudes on a number of issues. This survey focuses on California's economy and budget shortfall, the efforts to recall Governor Gray Davis and the threat of war against Iraq.

The sampling frame for this survey is all telephone residences in the state of California. One thousand three hundred men and women 18 years of age or older were contacted by telephone February 27-March 3, 2003. The sample includes 1,055 registered voters.

Results are adjusted to conform with census figures on characteristics such as sex, race, age, education and party registration. Telephone numbers were generated from a computer list that includes all possible telephone exchanges in the state. Random-digit dialing techniques were used to ensure that both listed and unlisted residences had an opportunity to be contacted. Interviews were conducted in both English and Spanish.

Readers are reminded that, since survey research normally questions only a small proportion of the population, one must allow a certain margin for error. The margin of sampling error for the entire sample and for registered voters is plus or minus 3 percentage points. For certain other subgroups, the error margin is somewhat higher.

Surveys of this kind are sometimes subject to different kinds of inaccuracies for which precise estimates cannot be calculated and which may, in some cases, be even larger than the effects associated with sampling procedures. For example, findings may be influenced by events, which take place while the survey is in the field and, of course, events occurring since the time the interviews were conducted could have changed the opinions reported here. Undetected flaws in the way the sampling and interviewing procedure were carried out could have a significant effect on the findings. Changing the wording of questions and the sequence in which they are asked can produce different results. Sometimes questions are inadvertently biased or misleading. People who responded to the survey may not necessarily replicate the views of those who refused to be interviewed or who could not be found at home during the time the survey was conducted. Moreover, while every precaution has been taken to make these findings completely accurate, other errors may have resulted from the various practical difficulties associated with taking any survey of public opinion.

Susan Pinkus directs the Los Angeles Times Poll under the general supervision of Dean Baquet, managing editor. Jill Darling Richardson is the associate director, Roger Richardson is the field director, Claudia Vaughn is the data management supervisor and Ray Enslow is the publications coordinator.

Some say that tax increases would hurt the economy, so the budget should be balanced by reductions in spending only. Some say that in order to close the shortfall, taxes should be increased, which would allow needed programs to continue. Some say that to close a record shortfall like this one, a combination of spending reductions and tax increases is required.

Which comes closest to your view? Q62.

As you may know, opponents of Governor Davis have launched an effort to gather petition signatures to recall him -- that is, to force a special election in which voters would decide whether to remove the governor and elect somebody else to replace him. Supporters of the recall accuse Davis of mismanaging the state and causing its budget problems and argue that he should therefore be removed from office. Opponents of the recall effort say the budget shortfall is mainly a result of a slowing economy and this is a partisan Republican effort to overturn the results of the November election. What do you think? In your opinion has Governor Davis mismanaged the state or do you think this is a partisan Republican effort? (ACCEPT "BOTH" OR "NEITHER" AS A VOLUNTEERED RESPONSE)

''(ASKED OF REGISTERED VOTERS)

.

PREQ69. (PREQGOV)

Many people tell us they don't always get to vote in every election. Sometimes they are prevented by illness or emergencies, or sometimes they don't have a preference for any candidate, or sometimes they are not interested in that particular election, or sometimes they have no way to get to the polls... and there are often other reasons.

.

Q69. (QGOVOT02)

Specifically, do you remember for certain whether or not you voted for California governor this past November in the general election, or did something prevent you from voting, or did you choose not to vote?

(IF VOTED IN CALIFORNIA) Did you vote for Gray Davis, the Democrat, or for Bill Simon, the Republican, or did you vote for someone else?

(IF PREVENTED) Were you old enough to vote this past November or not?

(IF WASN'T A CALIFORNIA RESIDENT, ASK) Well, did you vote in the last gubernatorial election in another state, or not?
